EIP applications are now open!

Excellence in Professionalism (EIP) was created in the fall of 2011 to assist students in developing and enhancing their professionalism! Workshops range from designing a professional LinkedIn profile to networking.

Priority applications are accepted until August 31; applications may be accepted after this date.

Check out http://tinyurl.com/IUPUIExcellence for more details on how to apply!

Why past EIP participants think you should participate!

"I have gotten more out of this FREE program than many of the classes that I have paid to take." —Senior studying biomedical engineering

"I would recommend this program to others because it shows through your resume that you are dedicated to developing professional skills for the workplace and that you are not just a blank slate that has no experience." —Sophomore studying sociology

"Simply getting good grades in classes is not enough to make you marketable or hire-able, employers want to know that you will blend well with the company's culture, get along with coworkers, and be professional in all parts of your work. I would recommend EIP to all students... because it is a great soft skill development tool and provides invaluable advice for the 'real world.'" —Senior studying English literature
